price \$159); get a free Jabra Blue-  
tooth headset worth \$69.90 when  
you spend at least \$150 on any of  
Microsoft's hardware products

The Microsoft LifeCam NX-6000 is a compact notebook webcam that is optimised for Windows Live Messenger. Thanks to tight integration, you can add special effects and control your webcam from your Windows Live Messenger window. The

webcam is also compatible with Skype, Yahoo! Messenger and AOL Instant Messenger.

Its 2-megapixel resolution allows you to capture high-quality footage while the 71-degree wide-angle lens lets you capture a bigger view.

The lens can retract into the body of the webcam when it's not in use, protecting it from bumps and wear and tear.

The audio performance of the NX-6000 doesn't fall too far from the tree, too, with a built-in unidirectional microphone that picks up audio well.
